

C2G

2-Port USB 1.1 Over Cat5 SuperboosterTM Extender Wall Plate Receiver

Part No. CG-29345

The overall plug-and-play solution consists of this wall plate receiver, and your choice of a compatible transmitter that is sold separately: the wall plate (#29344), the dongle (#29348) or the keystone insert (#29349). Customize the configuration to your specific needs! This versatility is ideal for applications where you need flexibility at your computer/source side.

The complete solution is connected via a standard Cat5, Cat5E, or Cat6 UTP cable (not included) that provides easy in-wall installation. This delivers a clean, finished look important for homes, classrooms, offices and anywhere you don't want visible cables lying around. Use pre-terminated network cables, or pull unterminated cable and use the included toolless IDC RJ45 connector to terminate your own cable. Because the USB superbooster wall plate is bus-powered, no external power source is required. Compliant with USB specification 1.1.

Input: Two USB Type A Female Output: One RJ45 Female

Please Note: The power demands of devices such as external drives and USB hubs may require the use of external power for proper operation.

Note: If the USB signal is being extended to support an interactive whiteboard, then we recommend using our product

Features & Benefits

Extends tw	n USR 1	1 signal up to 150f	over category cables	Allows for flexible r	nositioning of USB	nerinherals

Receiver is built into wall plates

Pair with a wall plate or dongle transmitter for complete solution
